

## PRES. WILSON INSISTS ON NO ANNEXATIONS

ROME, Sept. 26.—Via Paris.—President Wilson's reply regarding the new proposals for the disposition of Fiume has been received, the newspapers say. It insists upon his original view that the city should be internationalized and not annexed to Italy, becoming the center of a small buffer state between Italy and Jugoslavians.

The president does not insist, according to the press, upon a plebiscite in the buffer state at the end of fifteen years, as at first proposed, and he consents to the rectification of the eastern frontier of Italia in favor of Italy, in the district of Albania.

## ARMY OFFICERS IN COMMISSIONED LIST ANNOUNCED

WASHINGTON, Sept. 27.—Under the authority recently given to maintain the commissioned strength of the army at 15,000, the war department today announced the number each grade will have. The first follows:

General officers 101; colonels 692; lieutenant-colonels 797; majors 2,271; captains 5,408; first lieutenants 5,179; and second lieutenants 3,165.

In order that the officer lists may be out to the above figures, inclusive of regulars, a general reduction in grade will be ordered.

The majority of the officers are now graded on a total commission of 200,000. Designation of officers of the regular army who will be permitted to hold their temporary rank will be made by a board from the general staff, the announcement said, and all changes will have been completed prior to October 31.

**RENEWING WORN LEATHER SURFACES.**

The polished surface of the best of patent leathers will crack. This surface is an enamel and an enamel is yet to be made that will stand a continued bending strain.

But so long as the cracks do not extend through the leather itself, there is no occasion to despair. An application or two of a leather renewer,

## —And the Worst Is Yet to Come

intended to renovate not only patent leather shoes, but all kinds of worn, discolored or shabby automobile and furniture upholstery, tops, handbags, etc., whether made of leather or leather substitutes, will cover the cracks in the enamel and make the shoes really presentable again.

It produces a water-proof, glossy black finish that will not rub off. It is very easily applied by anyone.

### ANENT TROUBLESOME GREASE SPOTS.

A peculiarity of most all amateur repairmen is that, although they have work clothes especially adapted to receive grease spots and car dirt, they never bother to put on these old habiliments for doing ordinary tinkering because, for some reason, they never expect to get dirty. Ten minutes time to change may save a seventy-five-dollar suit. Spend that time and put the saving into Liberty bonds or thrift stamps.

But, if you do have the misfortune to get grease or oil spots on your good clothes, here is a valuable hint that comes from an old dry cleaner friend of ours. It is most effective where the spots have not been allowed to stand too long. First, sprinkle the spotted places with talcum powder, rubbing it well into the cloth. This

done, dust more powder over the spots and put the garment aside for several hours. This gives the powder time to absorb the oil or grease. Later, brush the spots with a stiff brush, and brush down to his real problem in the picture, that of saving the love of his rural sweetheart from being stolen by a "city dude" who appears in the community with a fine automobile.

In order to prevent tires from sticking to the rims it is necessary to keep the rims from rusting. This is most satisfactorily accomplished by the use of flake graphite, mixed into a creamy paste by adding a small percentage of gasoline and applied to the rims just like ordinary paint. The gasoline evaporates and leaves the graphite which prevents rusting and holds the tire bead away from the rim.

## CHAPLIN DOES A HIGHBROW DANCE IN NEWEST FILM

Charlie Chaplin "expresses himself" in the new aesthetic dances, which are quite the thing in the most artistic circles, in "Sunnyside," his third million dollar picture, released by First National, which will be shown at the Orpheum Theatre three days commencing Sunday. The manner in which Charlie gets in with a group of beautiful and scantily draped young girls which are engaged in this sort of dance is quite Chaplinesque.

Such a thing as riding a cow is almost never attempted in the country even by the boy and girl who take the cows out to pasture and bring them back at night. But Charlie attempts this when he tries to induce a cow to leave the church in which the bossy has been breaking up meeting.

Landing in a ditch on his head, the little comedian goes into a state of coma wherein he "sees things." While these are imaginary to him, on the screen they seem real enough, and the sight of Charlie burlesquing the serious sort of dance which St. Denis, and Hoffman, and other less famous give, surrounded by beautiful young girls, bare of limbs, furnishes a most entertaining combination.

After this little diversionment Charlie settles down to his real problem in the picture, that of saving the love of his rural sweetheart from being stolen by a "city dude" who appears in the community with a fine automobile.

## NAVY PROGRAM FOR AVIATION NEXT YEAR MADE

WASHINGTON, Sept. 27.—The effectiveness of aviation as an adjunct fighting unit of the service will be demonstrated by experiments provided in the aviation program of the navy department next year, plans for which are now being made. The program will call for a full division of the larger type of seaplanes for both the Atlantic and Pacific fleets. Four battalions of each fleet selected for speed and fighting power will be selected to carry fast scouting planes of the army type for practical tests of their ability on long distance scout patrol.

Six tenders will be allotted to the fleet including the Shawmut for the Atlantic and the Arcostock for the Pacific.

Other plans call for the enlargement of aerial equipment at all naval bases, establishment of training units at the larger colleges throughout the country and the
